Date: 2023

PDSH: PDSH 2238
Year of publication: 2024
Approved by CTL Plenary 2024

DSH
Publication date: 2024-09-20

The ETSI TS 103 701 V1.1.1 (2021-08) scope is defined as per below:

«The present document specifies a conformance assessment methodology for consumer IoT devices, their relation to associated services and corresponding relevant processes against ETSI ETSI EN 303 645, addressing the mandatory and recommended provisions as well as conditions and complements of ETSI EN 303 645 by defining test cases and assessment criteria for each provision. The present document intends to support suppliers or implementers of consumer IoT products in first-party assessment (self-assessment), user organizations in second party assessment, **independent testing organizations in third party assessment and certification and conformance declaration scheme owners in operating harmonized schemes**. Defining a certification or conformance declaration scheme is out of scope of the present document.

It means especially that without such a document evaluation methodlogy will be different from one NCB to another. Using or not this metholdogy will impliey large differerences in the quality and reliability of ETSI EN 303 645 compliance evaluation to deliver CB certificate. Especially the concept of IXIT used in the methodology is key.
