IEC 60598-1:2020	5.4	2274
Category		
LITE		
Subject	**Keywords**	**Provided to**
Class III luminaire with reduced cross-sectional area	Class III	ETF 5
Question		
For a class III luminaire (for example a recessed spot), is it allowed for the wiring to have a cross-section smaller than 0,4 mm²? Remark: The LED driver is not included in the luminaire.		
Decision		
In case of constant current supply, a cross-section smaller than 0,4 mm^2 is allowed as per clause 5.4, since it will not change the current in any condition. In case of constant voltage supply, the manufacturer shall specify in the instruction sheet the specific type of control gear to be used. The control gear has to be available on the market. This control gear will be used for further testing of the luminaire.
