About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,…).
It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.
Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Customer Service Centre - webstore.iec.ch/csc

CTL DECISION SHEET (DSH)

Standard(s)	**Subclause(s)**	**Tracking No.**	**Year**
IEC 60601-1-2:2007 IEC 60601-2-49:2011	6.2.4.1 202.6.2.4.1	DSH 2015	2015
Category			
MED			
Subject	**Keywords**	**Developed by**	**Approved at**
Electrical fast transient burst test for patient-coupled cables	Electrical fast transients, bursts, patient-coupled cables	ETF-3	2016 CTL Plenary Meeting
Question			
Shall patient-coupled cables longer than 3 m be required to be tested directly or indirectly?			
Decision			
Indirectly. Patient connections, regardless of length, are not tested with the direct method with EFTs			
Explanatory notes			
Both standards do not clearly indicate whether patient-coupled cables shall be tested directly or indirectly if the cable is longer than 3 m. The main part IEC 60601-1-2 indicates the situation when the cable is shorter than 3 m and IEC 60601-2-49 gives a mitigation that a temporary degradation is allowed when the cable is longer than 3 m.
