About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,…).
It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.
Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Remote end of neutral electrode	Patient conductor, remote connector, insulation	ETF-3	2016 CTL Plenary Meeting

Question

This following connector (see picture) is very often used as the remote end of neutral electrode cable of surgical equipment. Is it in compliance with IEC 60601-1 and 60601-2-2 requirements?

Decision

The described connector does not comply with the requirements of the two standards if it can be inserted into main receptacles, as it can come into contact with possible hazardous voltage.

Explanatory notes

Subclause 201.8.5.2.3 of IEC 60601-2-2:2009, which covers high frequency surgical equipment, provides more precise requirement about the expected type of insulation for this connector:

“This requirement shall not apply to the ACTIVE CONNECTORS or to any NE connectors except as detailed below.

For NEUTRAL ELECTRODE cables, the connector which is remote from the PATIENT shall be constructed so that the connections can not contact conductive live parts of FIXED mains socket outlets or MAINS CONNECTORS.
