DECISION SHEET

Standard(s)- (year and edition):	**Sub clause(s):**	**Sheet n°:**
IEC 60601-1:1988 Ed.2 Am1+Am2	20, 20.1 A-a1)	**DSH-402**
Subject: General requirements	**Key words:** Basic insulation A-a1, intermediate circuit	**Confirmed by CTL at its 39th meeting, in Cologne**

Question:

The requirements in 20.1 would appear to apply also to intermediate circuits which may or may not remain live after interruption of the protective earth conductor.
Should A-a1) be applied also in those case where the intermediate circuit ceases to be live after interruption of the protective earth conductor?

Decision:

Requirements for Basic insulation A-a1) should be applied only to those intermediate circuits which may be hazardous in single fault conditions.

Explanatory notes:

Insulation requirements are intended to provide protection for circuits which could be hazardous in single fault condition.
