DECISION SHEET

Standard(s)- (year and edition):	**Sub clause(s):**	**Sheet n°:**
IEC 60601-1:1988 Ed.2 Am1+Am2	57.9 57.9.4	**DSH-426**
Subject: Triple insulated windings	**Key words:** Triple, insulated, winding, transformer	**Confirmed by CTL at its 39th meeting, in Cologne**

Question:

Many manufacturers are using a triple insulated winding wire on a transformer, where DOUBLE, or REINFORCED INSULATION is required between the primary and the secondary windings. Is this permitted?

Decision:

This is allowed, but precautions should be taken concerning possible mechanical damages to the wires. Other requirements of 57.9 shall be applied.

Explanatory notes:

In IEC 60950, Am3 and 4, clause 2.9.4.4 (Ed. 2) requires such winding wire to meet the requirements of ANNEX U.
