COLLECTION OF THE CTL DECISIONS
DECISION SHEET

Standard(s)- (year and edition): IEC 60601-1:1988 Ed.2 Am1+Am2	**Sub clause(s):** 19	**Sheet n°: 534**
Subject: Figure 21, presence of resistor of 45 kO	**Key words:**	Decision taken at the 40th meeting 2003

Question:

Should the 45 kO resistor be used since the current is limited to 5 mA and the limit is 5 mA?

Decision:

For the 1st edition, use the method of 2nd edition (use any resistance).
For 2nd edition, instead of using any resistance, you may also use alteration of the voltage or fuses.

Explanatory notes:
