COLLECTION OF THE CTL DECISIONS
DECISION SHEET

Standard(s)- (year and edition): IEC 60601-1:1988+A1 +A2	**Sub clause(s):** 54	**Sheet n°: 535**
Subject: Reduction of clearance and creepage distances	**Key words:** Clearance, creepage, reduction, tracking resistance	Decision taken at the 40th meeting 2003

Question:

Is it permitted to reduce the creepage and clearance requirements of clause 57.10 based on evidence that the material being assessed has a high resistivity to tracking?

If it is permitted, what IEC Publication should be used as a guideline in determining the permitted reduced creepage and clearance distances?

Decision:

This edition of the standard does not allow reduction in clearance and creepage distance.

Explanatory notes:

This problem will be transferred to SC62A/WG14 to make a recommendation to the 2nd edition do deal with this issue. The 3rd edition will address this issue.
