About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,…).
It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.
Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Risk assessment	Risk, Risk analysis	ETF 3	2016 CTL Plenary Meeting

Question

It is unclear how CBTLs should handle clauses 16 and 17.

History up to date shows that test reports sometimes state that there are no identified risks in addition to clauses 6 to 16. There has not been any reference to risk assessment documentation in these test reports. This implies that the CBTL made the conclusion rather than the manufacturer.

In order to meet clause 17 one needs to perform a risk assessment. Besides, in order to establish that there are no risks not covered by clauses 6 to 16, one needs to perform a risk assessment. The conclusion of this seems to be that a risk assessment will always be needed.

1. Can a CBTL decide on its own that there are no risks not covered by clauses 6 to 16?
2. Should the CBTL always request the risk assessment documentation for inspection for all products before issuing a CB certificate?
3. Is it enough to inspect the result of risk assessment or should the complete risk management process be inspected?
4. To what level of detail should the documentation be inspected?

Decision

1. No, the client is responsible to show that there are no foreseeable hazards not covered by clauses 6 to 16. The CBTL has the right to request the assessment as per clause 17.
2. No, Risk Assessment may not be necessary for some products.

   Where there is reason to believe from the documentation of the client that there are risks not addressed by the standard, Clause 17 should be used as a tool.
3. It is sufficient to inspect the documentation and use clause 17 to verify compliance.
4. The CBTL shall be reasonably confident that the hazard not addressed by the series of IEC 61010 standards is addressed by clause 17.
