X CTL Provisional DECISION SHEET (PDSH)
☐ CTL DECISION SHEET (DSH)

Standard(s) (incl. year)	Subclause(s)	Tracking No.
IEC 62841-1:2014/AMD1:2025	All.	2298A
Category		
TOOL		
Subject	**Keywords**	**Developed by**
Use of part 2 standards with new updated part 1	Part 2 / 3 / 4 late updates	ETF 1

Question

Can IEC 62841-1:2014/AMD1:2025 be used with IEC 62841-2-x; -3-x and -4-x standards, since there is presently no version of standard IEC 62841-2-x; -3-x and -4-x that is published to be used in conjunction with the IEC 62841-1:2014 + IEC 62841-1:2014/AMD1:2025?

Decision

For the TOOL category, it is possible to issue a CBTR, when the particular standard (Part 2, 3 or 4) has not been updated to the latest Amendment of the Part 1 standard.

A statement shall be added to the GPI (General products information) section of the CBTR Part 1 and Part 2 standards showing justification to utilize a specific Part 1 Standard TRF based on references found in IEC Part 2, 3 or 4 Standard:

Generic Statement:

"Based on a demonstrated evidence usage of IEC 62841-1:2014/AMD1:2025 *(1)* with Part -2 or -3 or -4 Standard *(2)* was approved by the CBTL and consequentially TRF IEC62841_1H *(3)* was used for completion of this CBTR."

Note (1): Engineer needs to input correct amendment(s) including Publication Year.
Note (2): Engineer needs to input correct Part 2 or 3 or 4 Standard including Publication Year.
Note (3): Engineer needs to input correct TRF version.

Example:

"Based on a general analysis conducted by the manufacturer usage of IEC 62841-1:2014/AMD1:2025 with IEC 62841-2-2:2014 was approved and consequentially TRF IEC62841_1H was used for completion of this CBTR."

Explanatory notes

Enquiry: 2298
Date: 2025

PDSH: 2298
Year of publication: 2025
To be approved at CTL plenary: 2026
PDSH 2298A
Year of publication: 2026
Update PDSH 2298 based on the input from IECEE Secretariat (IECEE-CTL/874/INF) and according to Action Item 04:63/26 of the 2026 CTL Plenary Meeting

DSH
Publication date:

It can be found acceptable to use an IEC 62841-2-x or IEC 62841-3-x or IEC 62841-4-x standard, that has not been updated to the Amendment 1 (AMD1) of the IEC 62841-1:2014 together with IEC 62841-1:2014/AMD1:2025 right now.

Disclaimer: This document is controlled and has been released electronically.
Only the version on the IECEE Website is the current document version.

The main purpose of IEC 62841-1:2014/AMD1:2025 is, to bring the standard into compliance with the new European Machinery Regulation - most of these contents have been implemented into AMD1 as NOTES for Europe (only). AMD1 includes following (impacting) normative technical changes with respect to IEC 62841-1:2014:

- 21 Construction:

21.35: Extended requirements for dust extraction systems

21.36 & 21.37: New requirements for remote communication through public networks

- Annex K:

Revised test for fault conditions to electronically commutated motors (K.18.1) (reducing of required tests)

-Annex M / N (NEW):

Requirements for Remote communication through public networks

A general analysis conducted by the manufacturer is required to determine the suitability (no any technical contradictions) of using a part 2, part 3 or part 4 standard that has not been updated to the latest Amendment of the part 1 standard.

Example: The IECEE CBTL can use the IEC 62841-1:2014 + IEC 62841-1:2014/AMD1:2025 TRF combined with an IEC 62841-2-x or -3-x or -4-x TRF(s) which is/are in conjunction with IEC 62841-1:2014 because IEC 62841-1:2014/AMD1:2025 is suitable without technical contradictions to the EUT (equipment under test).
