Scope of the standard	dental equipment, dental unit, dental handpiece, dental handpiece and dental operating light	ETF-3	2016 CTL Plenary Meeting

Question

Subclause 201.1.1 of the standard states:
"This International Standard applies to the BASIC SAFETY and ESSENTIAL PERFORMANCE of DENTAL UNITS, DENTAL PATIENT CHAIRS, DENTAL HANDPIECES and DENTAL OPERATING LIGHTS."

From Dental Equipment is defined in subclause 201.3.202 as follows:
"ME EQUIPMENT with any combination of DENTAL HANDPIECES, DENTAL UNITS, DENTAL PATIENT CHAIRS and DENTAL OPERATING LIGHTS."

With this definition, DENTAL EQUIPMENT is any combination of sub-units.

1. Can the scope be understood as follows:
   201.1.1: This International Standard applies to the BASIC SAFETY and ESSENTIAL PERFORMANCE of DENTAL UNITS and/or DENTAL PATIENT CHAIRS and/or DENTAL HANDPIECES and/or DENTAL OPERATING LIGHTS, hereafter referred to as DENTAL EQUIPMENT.

2. Is it possible to apply the standard to the following products?

- Built-in OEM dental unit
- A handpiece, intended to be used in conjunction with a dental unit but not connected to it
- Dental equipment, with some handpieces, intended to be used in conjunction with a dental unit but not connected to it.
- Dental equipment with an internal electrical power source not connected to a dental unit
- Dental operating light alone
- Dental patient Chair alone

Decision

1. Yes, the scope can be understood with and/or between listed sub-units. Therefore, a single sub-unit can be considered as dental equipment.
2. Yes.

Explanatory notes

Refer to terms and definitions of dental unit, dental handpiece, dental operating light and dental patients chair
