COLLECTION OF CTL DECISIONS

Decision Sheet

Standard(s): **IEC 60950-1:2001** **IEC 60065 6.ed.:1998** **IEC 60065 7.ed.:2001**	**Sub clause(s):** **General**	**DSH-563** **Page 1 (1)**
Subject: **Components and sub-assemblies incorporating lasers**	**Key words:** **Components, Sub-assemblies lasers**	**Decision confirmed by CTL at its 42nd meeting 2005 in Cancun**

Question:
Can a CB Test Certificate be issued based on IEC 60825-1 for components and sub-assemblies incorporating laser devices?

Decision:

Components and sub-assemblies incorporating lasers can be certified to the relevant end product standard i.e. IEC 60950, IEC 60065, and also to IEC 60825-1, and can be provided with CB Test Certificates referencing the laser standard.
However this is only permitted if both the end product standard and the laser standard are listed on the CB Test Certificate..
.

Explanatory Notes:
The following definition was suggested during the meeting of the CTL:
Sub-Assembly: A product which is intended to be built into an end-product and which incorporates the laser component. The construction of the **Sub-Assembly** sufficiently defines the characteristics of the laser and its performance
