Requirements of subclause 1.5.9.4 of IEC 60950-1:2005 and IEC 60950-1:2005/A1 for combinations of varistors (VDR) and gas discharge tubes (GDT)	- Varistor - Gas discharge tube - Earthing	ETF2	2014 CTL Plenary Meeting

Question

Is it relevant in series connections of VDR+GDT, which component is connected to PE?
See circuit diagram below.

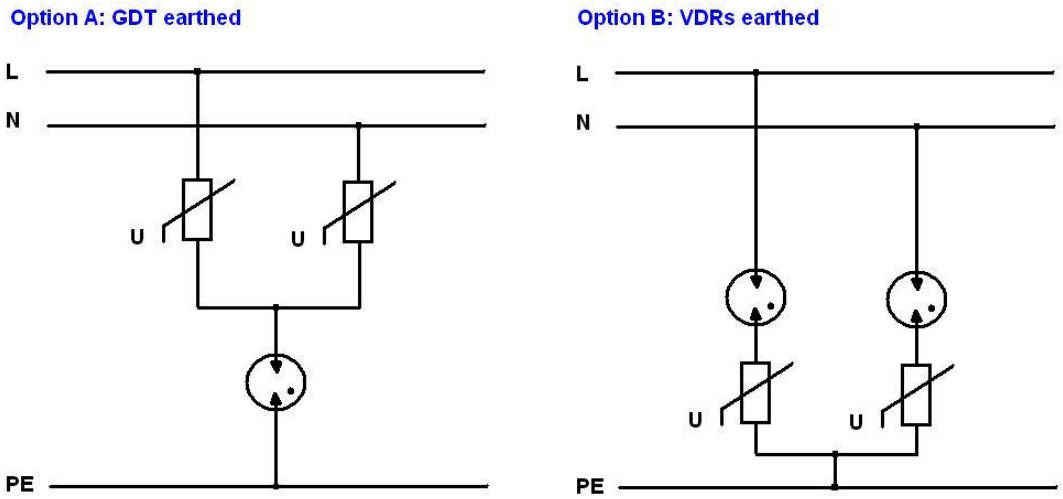

Decision

IEC 60950-1/A2 sub cl. 1.5.9.4 shall follow.

Explanatory notes

a) Two examples with different components connected to PE:
- Option A with the GDT connected to PE
- Option B with the VDRs connected to PE

In both options, the combination of VDR+GDT is connected to PE.

b) Other requirements of sub-clause 1.5.9 apply, in particular 1.5.9.1 and 1.5.9.2.
