COLLECTION OF CTL DECISIONS

Decision

Standard: IEC60950, 2nd and 3rd	**Sub clause:** 2.9.3, Table 6, Condition 2	**Sheet n.** 381 **Page** 1 (1)
Subject: Affect of adhesive on Comparative Tracking Index (CTI) of Insulating Tape	**Key words:** -comparative tracking index -CTI -insulating tape -adhesive	**Decision confirmed at CTL 38th meeting**

Question:

The measured Comparative Tracking Index (CTI) for an insulating tape with adhesive present can be different from that for the insulating tape without the adhesive present. The creepage distances to be applied depend upon the CTI of the insulating material.

Should the presence of adhesive on the insulating tape be considered in determining the CTI when determining the creepage distances requirements to be applied?

Decision:

Yes.
