COLLECTION OF CTL DECISIONS

Decision

Standard: IEC60950, 2nd (3rd) edition	**Sub clause:** 5.4.3(5.3.3) and App. C1	**Sheet n.** 386 **Page** 1 (1)
Subject: Overload of Transformers	**Key words:** -Transformers -Overload	**Decision confirmed at CTL 38th meeting**

Question:

How do you perform the overload test on a transformer used in a switched mode power supply? Do you agree with the following procedure?

A power supply output-circuit shall be loaded with the worst normal load while overloading that secondary winding which supplies the output-circuit.

Decision:

The load condition at the output of the switched mode power supply which causes the greatest heating effect shall be used. The load is not likely to be a short circuit
