COLLECTION OF CTL DECISIONS

Decision

Standard: IEC60950, 2nd (3rd) Edition	**Sub clause:** 1.2.8.3(1.2.8.4)	**Sheet n.** 387 **Page** 1 (1)
Subject: Hazardous Voltage	**Key words:** -Hazardous Voltage	**Decision confirmed at CTL 38th meeting**

Question:

Which of the criteria 42,4Vpeak or 60Vdc do you find should be applied as the compliance criteria, in order to determine whether the voltage shown in the graph is hazardous or not?

Condition: The circuit that generates this voltage is not a limited current circuit.

Decision:

This voltage is a hazardous voltage because it exceeds the 42,4Vpeak as written in 1.2.8.3
